Vision, Video and Graphics

one day workshop
Friday 14th September 2007
Warwick University
In association with BMVC 2007

coo-chairs:
Peter Hall (University of Bath) pmh@cs.bath.ac.uk
John Robinson (University of York) jarl1@ohm.york.ac.uk
Roland Wilson (University of Warwick, local chair) Roland.Wilson@warwick.ac.uk

The VVG’07 one day workshop is to take place immediately following the British Machine Vision Conference 2007. See http://www.dcs.warwick.ac.uk/bmvc2007/index.html for details of BMVC and the workshop.

**Guest Speaker:** Aaron Hertzmann, University of Toronto.

The workshop theme is the convergence of Vision, Video, and Graphics. Specific areas of interest include, but are not limited to:

- Image Based Rendering and Modelling
- Content Based Information Retrieval for images and video
- Video conferencing
- Augmented Reality and HCI
- Graphic insertion into photos and video
- Vision methods in image and video compression
- Non-photorealistic rendering from photos and video
- Video visualisation
- Animation Dynamics

Please send your contributions to any of the chairs.
Selected high quality papers will be invited to submit to the Annals of the British Machine Vision Association.

Accepted papers will be distributed via CD at the meeting; choose your own style.
Deadline: 29th June 2007, Extension to 27th July.
All material will be burned to a disc, so there is no page limit.
The BMVC page style is recommend but not mandatory, see the website for templates.

The VVG Network of Excellence is sponsored by EPSRC.
